product sheet

Coda

Coda is a stackable chair made of recycled plastic. It has a great mobility that secures soft movement and good comfort. The plastic shell is twofold that allows creative colour combinations.

Coda is delivered with integrated linking as standard.

Coda can be supplied with armrests with brackets. The chair is delivered with permanent or removable cushions in seat or/ and back.

Coda is also available with narrower frame without integrated linking. Can be delivered with five star base.
