

Favn

FAVN is a design from Anderssen & Voll.

A chair in laminated wood and steel chassis, where the round and slightly wide shapes in the seat and back give the chair a generous and sympathetic character.

FAVN is Norwegian and means 'embrace', which is exactly what this chair does - it embraces the body and offers unique support and comfort.

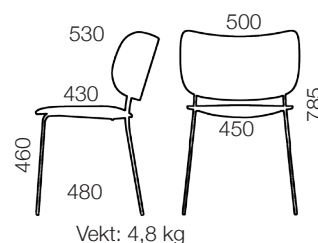

The chair fits adequately for use in assembly rooms, in a teaching context, in canteens or as a simple conference chair.

The chair is introduced with and without cushion, it also comes with two different frames.

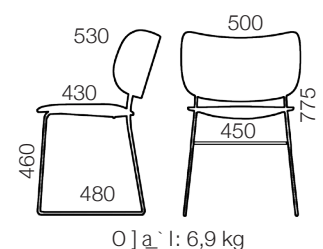

Favn is delivered in matte black, orange/brown (RAL 8023), grey/white (RAL 9002), ocean blue (RAL 5020), capri blue (RAL 5019), and in nature colors; oak, ash, beech and walnut. Other colors is available on request.

Subframe is delivered in chrome or in lacquered matching colors.

Favn 4-legs
