

Coda

Coda is designed with a rocking function that follows your movements, providing a unique seating comfort. This makes it the perfect chair for meeting and conference rooms, as well as classrooms. The chair features a two-part shell. The chair comes standard with an integrated row connector. Coda can also be supplied with armrests featuring a smart hanging function, allowing the chair to be hung on the tabletop. The chair is available with replaceable seat and back cushions.

The seat is produced by NCP in recyclable polypropylene. The aluminum legs are supplied as standard in black but are also available in a silver lacquered finish. Coda offers excellent stacking properties. For storage, we provide the "Flexi" trolley, which holds up to 14 Coda chairs.

Coda is also available with a narrower frame without row connection, as Coda Light, or with a wheeled base.
