

# Coda Light

Coda Light is one of the best chairs on the market for conferences, meeting rooms, and educational environments. The chair features an ergonomic seat with a rocking function that follows the body's natural movement. It is available with a smart tabletop hanging option. Like other chairs in the Coda series, the seat comes in several colors and is produced by NCP in recyclable polypropylene.

Coda Light can be supplied with replaceable seat and back inserts in various fabric qualities.

The legs are made of aluminum, standard in black lacquer, and also available in silver finish.

Coda Light offers excellent stacking properties. For storage, see our "Flexi" trolley, which holds up to 14 Coda Light chairs.

Please note: Coda Light does not include an integrated row connector or the option for armrests.
