

S-1500 bar stool

The S-1500 Bar stool is a modern interpretation of Bendt Winge's classic R-48 chair, redesigned by Snøhetta. The chair shell is made from 100% recycled plastic waste sourced from fish farming facilities along the Norwegian coast. The material is molded by NCP in Norway, the material is giving each chair a unique appearance. By choosing the S-1500, 1,500 grams of plastic waste are reused, while significantly reducing the CO₂ footprint compared to products made from virgin plastic. The chair comes standard with a black lacquered frame. Alternatively, the frame can be supplied in colors that match the seat shell. Available in six standard colors from our Ocean color palette.
